The past months have seen Yap International executing on its plan to become a leading supplier of VoIP technology including the following milestones: On November 17, 2004, Yap International revealed a unique and patent pending technology marketed as the Nomad, or the Yap International Personal Gateway. The Yap International Personal Gateway (the Nomad) is a patent-pending solution to a real problem that is inherent in all current and competing VoIP gateways. The problem is the end user is limited to the physical location of the Gateway in order to make a VoIP call. The Nomad's unique and patent pending technology allows the customer to make VoIP-enabled calls from any telephone, not just one physically connected to the Gateway. For the first time a customer may call their Personal Gateway from any cellular or landline push button phone in the world, (or even through their laptop or PDA), connecting to the Internet for VoIP call savings and other online information services, bypassing either partially or entirely the high cost of International Long Distance charges from incumbent telecommunication providers. On December 17, 2004, Yap International announced its first major contract involving the use of its technology products. Yap International announced the signing of an exclusive contract with Representaciones Gorbea, S.A. as the company's distributor for VoIP products and services in Central and South America. Representaciones Gorbea, S.A. (RGSA) has a major presence in the region. RGSA entered into an exclusive contractual agreement with the second largest carrier in the region for 200,000 VoIP units to be deployed throughout Guatemala in 2005. The contract represents in excess of \$52 million USD and Yap International expects that its products will comprise the largest share of the order. RGSA is also the exclusive representative for Level 3 (LVLT-Nasdaq) in Central America. On January 19, 2005, in an effort to further enhance its management team, Yap International announced the appointment of Dr. Vladimir Karpenkov, MS, Ph.D. as the Company's Chief Information Officer. Dr. Karpenkov earned his PHD at Ural State University and has completed 2 separate Master of Science degrees in general programming /data base management and the physics of electro magnetic occurrences / optics of semi conductors respectively. Dr. Karpenkov is diverse background also includes direct involvement in the development of proprietary technologies and systems, many of which have been patented in the U.S. and Europe. One such system was the first cellular phone network for the city of Chelyabinsk, Russia which was developed by Dr. Karpenkov in partnership with Milliken GMBH of Germany and Radio Telephone Inc. of Russia. Our agreement with Securities Trading Services Inc. and the developments of the past months leaves us with tools necessary to commercialize and market our products on a global scale. We expect our milestones to be met and thus executing our business plan as anticipated", stated Jan Olivier, CEO of Yap International Inc. About The Company: Yap International, Inc. is a multi-national Internet Communications Company developing cost effective telecommunications through Voice over Internet Protocol (VoIP) technologies. The Company holds the exclusive rights to a revolutionary VoIP product line called NOMAD SYSTEMS that has Dial-up, Broadband, DSL, Cable, Satellite and Wireless capabilities. The Company plans on targeting: 1) National fixed line II & III Tier carriers which are interested in effectively competing with the dominant carrier in their marketplace, 2) Large multinational corporations which need to have US or European presence by having, (for example), a United States number ringing in their offices in Guatemala or London- offering business partners a more economical way to communicate, and 3) Immigrants in North America, a means of significantly lowering their communication expense with their relatives in their country of origin. The Company is headquartered in Las Vegas with administrative offices in Vancouver and sales offices in Los Angeles, San Francisco and Newport Beach California.

(Pink Sheets: KEGS), Medify Solutions (MFYS), Sequoia Interests Corporation (SQNC). Wysak Petroleum (WYSK) Current Price: 0.21 Wysak Petroleum announces the signing of a Letter of Intent with the European Commission Baltic Renewable Energy Centre (EC BREC) to assist Wysak Petroleum in the development of the Wysak Wind Power Project. EC BREC and Wysak have signed a LOI in respect to the development of a full-sized Commercial Wind Power Project in Europe. This letter states full that EC BREC can support Wysak in matters such as financial structuring and investment, regulatory issues, government policies, negotiations, wind technologies, reguland other aspects relating to Wind Power. About the Wysak Wind Project This development will be up to a maximum 90Mw in size and cost upwards of \$120 million in development expenditures. Once completed, this Wind Park will supply upwards of 170,000 Mw of electricity annually for Poland and the European Community. This is enough green energy to supply upwards of 25,000 homes with electricity and offset nearly 170,000 tonnes of Greenhouse gases. Total gross electric sales over a 20-year period are estimated at over \$450 million for a project this size. About the EC Baltic Renewable Energy Centre The mission of European Commission-founded EC BREC is to stimulate the development of renewable energy sources (RES) in Poland through the developeconstruction

---

of RES projects, the development of innovative technologies, and the creation of relevant policies, strategies and plans. To fulfill the mission, EC BREC reuses its own research capabilities and cooperates with partner institutions from the EU, other countries, and international organizations. About WYSK Petroleum WYSK is a diversified energy company whose goal is to identify and develop traditional fossil fuel sites, as well as clean air alternative energy producing technologies. WYSK controls one Wyoming Federal oil & gas lease in the Bighorn Basin region and another in the Green River Basin. Its two Wyoming State leases are located 45 miles apart within the massive CoalBed Methane play area of the Powder River Basin. Numerous large petroleum and exploration firms operate near to all of these properties; they include ExxonMobile (XOM), Williams Gas (WMB), and Western Gas (WGR) among others. Collectively, over 26,000 wells produced 54.7 million barrels of oil and 1.75 trillion cubic feet of natural gas in Wyoming Conclusion: The Examples Above Show The Awesome, Earning Potential of Little Known Companies That Explode Onto Investor's Radar Screens; Many of You Are Already Familiar with This.
